Services Division

Committee on European Satellites

(EuSat Committee Meeting - 16th Meeting - 1330 13 June 1956)

Present:

25X1A9a

Most of the discussion was on the subject of agricultural development and problems in the European Satellites. One reason for exploring this topic at this time was to have a preliminary airing of a subject which will be discussed by an agricultural expert at the next meeting. Certain questions arose in the discussion which will be passed on to the speaker for his guidance in preparing for the meeting.

25X1A9a [REDACTED], M/AG, will be the speaker on 20 June. As the principal agricultural analyst for the Satellite area he is particularly well qualified to review some of the principal trends and problems in EuSat agriculture. Members are urged to assemble promptly on Wednesday at 1330 in room 2125 M.

[REDACTED]  
Chairman

25X1A9a
